Alex Example

Research Engineer

Email · Website · GitHub · LinkedIn · Google Scholar

Research engineer working on information retrieval and machine learning. Develops evaluation methods and turns research prototypes into reliable software.

Professional Experience

09/2024–present **Example Research** · Research Engineer — Zürich, Switzerland

Project: *Evaluating Search over Company Knowledge*

- Built evaluation frameworks for retrieval and document parsing; deployed the resulting features in production.
- Developed a benchmark spanning documentation, support conversations and source code.

09/2022–06/2024 **Example University** · Teaching Assistant

- Prepared and taught weekly mathematics exercise classes for 30 undergraduate students.

Education

09/2022–06/2024 **Example University** · MSc Computer Science — Zürich, Switzerland

GPA: 5.7/6.0; credits: 120/120 ECTS; focus: Machine Learning

Thesis: *Learning to Retrieve Evidence from Technical Documents*

Supervisor: Prof. Jordan Example (Information Retrieval Group)

01/2023–06/2023 **Partner University** · Exchange Semester — Copenhagen, Denmark

08/2023 **Example Institute** · Summer School — London, UK

09/2019–06/2022 **Example University** · BSc Mathematics

Selected Projects & Publications

2024–present **Open Search Toolkit**

- Created an open-source toolkit for comparing retrieval methods on reproducible datasets.

2024 Evaluating Retrieval on Heterogeneous Collections

Paper; Code; Dataset

Additional Experience

Volunteer Programming Mentor

Led introductory Python workshops for local secondary-school students.

Skills & Languages

Technical: Python, SQL, PyTorch, Git, Linux

Languages: English (fluent); German (native); French (conversational)
